

XOGEN360

XOGEN360

Collagen-P Advanced Wound Care Sheet

XoGen360 meets the requirements of an on-lay collagen device. XOGen360 is a absorbant onlay microfibrillar spun collagen, formed as a sheet into 6 layers and absorbs 5x its weight.

XOGen360 helps to create a favorable physiological environment to support wound healing adjacent to:

- surgical wounds
- trauma wounds
- diabetic ulcers
- partial thickness burns
- pressure ulcers
- venus stasis ulcers

Collagen is able to take on the critical role of all stages of wound healing from stopping the flow of blood and inflammation to proliferation and remodeling.

- Orthopedic
- plastic/ Reconstructive
- Sports Medicine
- Trauma
- General
- Vascular
- Obstetric/Gynecology
- Neurologic
- Cardiovascular
- Podiatry

XOGen Collagen

- No reported foreign body reaction, fibrin clot formation for biological seal.

Optimized Resorption

- Resorbs as new tissue forms.

Can Be trimmed
wet or dry

Can absorb 5x its
weight

XOGen360
formulation
preserves structural
& functional
characteristics
of collagen

XoGen360, safe and effective in over 450,000 patients

- XOGen360 Collagen- P Sheets are indicated for the management of moderately to heavy wounds and to control minor bleeding.
- XOGen360 Collagen- P is an active absorbable collagen.
- During regeneration, damaged tissues are replaced by new tissues.
